Assistant/Associate Professor of Electrical Engineering and Computer Science - Syracuse University

The department invites applications for a faculty member at the tenure track Assistant or Associate Professor level in the discipline of Electrical Engineering for a position funded by an endowment. The preferred areas of research are Power (Energy) Systems and Smart Grid, however, excellent candidates in other areas will also be considered. The new faculty member should be capable of collaborating with existing EECS faculty members who have active research interests in the energy systems, smart grid, and wireless communications areas.

Preference will be given to candidates who can develop successful inter-disciplinary research proposals. We are particularly interested in candidates with prior participation in successful proposal-writing.

A doctorate in electrical engineering is required at the time of employment. Start-up funds commensurate with the needs of the individual will be provided for the successful candidate.

Review of application will begin immediately or until the position is filled. The starting date is August 24, 2015. For more information or to apply, go to www.sujobopps.com (071427). For detailed information about the Department of EECS, please see the following web site: http://eng-cs.syr.edu/our-departments/electrical-engineering-and-computer-science/.

Syracuse University is interested in candidates who have the communication skills and cross-cultural abilities to maximize their effectiveness with diverse groups of colleagues, students and community members. Women, military veterans, individuals with disabilities, and members of other traditionally underrepresented groups are encouraged to apply. Syracuse University is an equal opportunity employer, as well as a federal contractor required to take affirmative action on behalf of protected veterans.
