Assistant/Associate Professor - Computer Engineering - Syracuse University

Syracuse University's Department of Electrical Engineering and Computer Science (EECS) is seeking to hire a faculty member at the tenure track Assistant or Associate Professor level in the discipline of Computer Engineering. The preferred areas of research are Computer Architecture and VLSI, however, excellent candidates in other areas will also be considered. The new faculty member should be capable of collaborating with existing EECS faculty members who have active research interests in Green Computing, Cybersecurity, and Wireless Communications.

A doctorate in computer engineering or computer science is required at the time of employment. Start-up funds commensurate with the needs of the individual will be provided for the successful candidate.

Review of applications will begin immediately or until the position is filled. The starting date is August 24, 2015. For more information or to apply, please go to www.sujobopps.com (071428). For detailed information about the Department of EECS, please see the following web site: http://eng-cs.syr.edu/our-departments/electrical-engineering-and-computer-science/.

Syracuse University is interested in candidates who have the communication skills and cross-cultural abilities to maximize their effectiveness with diverse groups of colleagues, students and community members. Women, military veterans, individuals with disabilities, and members of other traditionally underrepresented groups are encouraged to apply. Syracuse University is an equal opportunity employer, as well as a federal contractor required to take affirmative action on behalf of protected veterans.
